General Plan Definitions

The following definitions should be substituted into the General Plan Glossary in order to obtain consistency between General Plan and the LMC definitions:

In place of the definition for Flood, 100-Year:

"Base Flood" means a flood which has a one percent chance of being equaled or exceeded in any give year. Also referred to as the "one hundred year flood".

Pg. 163

In place of the definition of Flood Plain:

"Floodplain or flood-prone area" means any land area susceptible to being inundated by water from any source; see definition of "Flooding" in LMC Chapter 11.08.

Pg. 163

In place of the definition of Floodway:

"Floodway" means the channel of a river or other watercourse and the adjacent land uses that must be reserved in order to discharge the base flood without cumulatively

increasing the water surface elevation more than one foot. Also referred to as “regulatory floodway.”
